 VENETO ECONOMIA

Italy's largest ice factory is located in Quarto d'Altino

 **la Nuova**

Quarto d'Altino is home to Italy's largest ice factory

Radio24
LIBERA LA VOGLIA DI FARE

The record heat and the water crisis are affecting several areas of our country, forcing us to think about saving resources and using them in a more balanced way. An interview with those who decided to invest in water and in its most common derivative: ice.

COMPANY

GhiaccioFacile

Premium Italia
GhiaccioFacile

Our company Premium Italia is specialized in the production and packaging of ice cubes and crushed ice for food use that we distribute in the national territory under the name **GhiaccioFacile®** and in the international market under the name **EasyIce®**

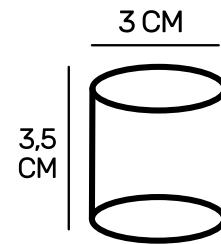

Our PRODUCTION PLANT is located in the province of Venice and it is ONE OF THE LARGEST IN ITALY WITH A CAPACITY OF MORE THAN 120,000 KG OF EDIBLE ICE PER DAY.

Our mission is to address the increasing demand for food ice that has arisen in ITALY and throughout EUROPE in recent years.

What sets us apart:

- Our PRODUCTION PROCESS adheres to the stringent standards established by the IFS FOOD certification.
- We maintain a high level of product quality.
- Our commitment to transparency and reliability guarantees zero stockouts in the supply chain.
- We prioritize dedicated focus on customer interactions

32 x 32 x 32 mm

The size of perfection is a cool cube to enjoy your favourite drink at their best.

GhiaccioFacile® meets and addresses the need for purchasing a product that is immediately ready to be used

PRODUCTS

CRUSHED ICE in a 5kg and 10kg package

tailored to meet the requirements of major consumers

- **Fish shop:** since it is a food product subject to strict health and hygiene regulations, our product is well-suited for direct food contact. This makes it particularly suitable for displaying fish in restaurants, supermarket fish counters and fish shops
- **Confectionery:** our product seamlessly integrates into industrial leavening processes as a technological sweetener. Its role is to regulate leavening temperatures.
- **Wineries:** following the destemming process, the must can be rapidly cooled using ice to approximately 5°C. This cooling period typically lasts for around 12 hours before pressing. The low temperature enables the must to absorb a wide range of aromatic compounds, resulting in a wine that boasts an exceptional abundance of primary aromas.

NEWS

EasyIce Slim Pack
packaged ice for food use

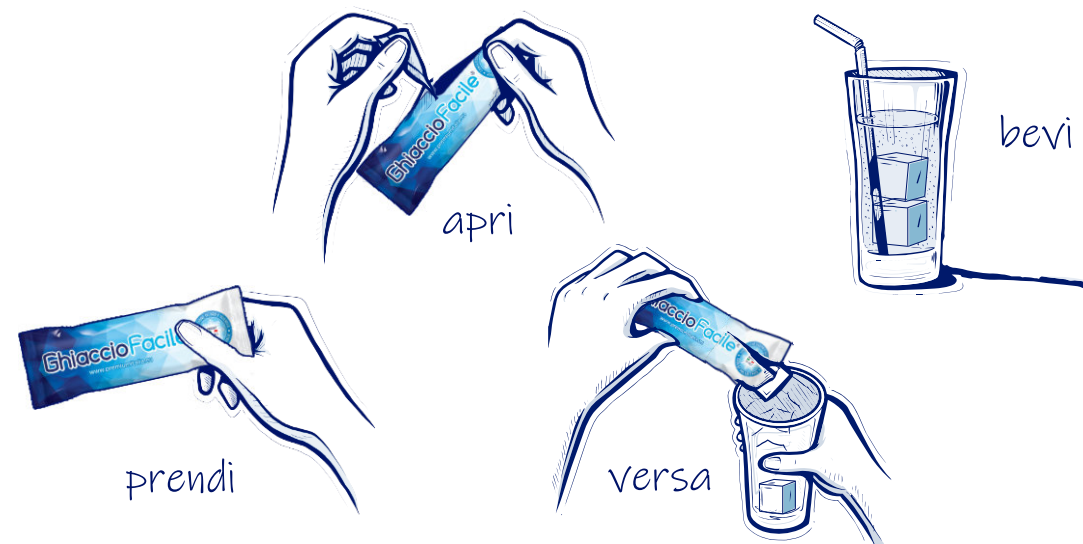

Safe and space-saving

The rising demand for home frozen food storage and the necessity for hygienically secure single-dose packaging have led us to create this innovative product: certified high-quality ice conveniently arranged in a practical 2-ice cube packaging, known as the **SINGLE DOSE**.

PRODUCTION

A SAFE FOOD PRODUCT

The BRC Food and IFS Food standards impose strict controls on all work processes, spanning from sourcing raw materials to the final product. Furthermore, meticulous inspections are carried out in accordance with the principles outlined in the Hygiene Package - Reg. CE 852-853-854-Ref. 178/2002 stated in the Manual of Correct Operating Procedures for the Production of food ice.

IFS FOOD certificate - COID 60302 cert.n.
252517 - 2017 - AIFS - ITA - ACCREDIA

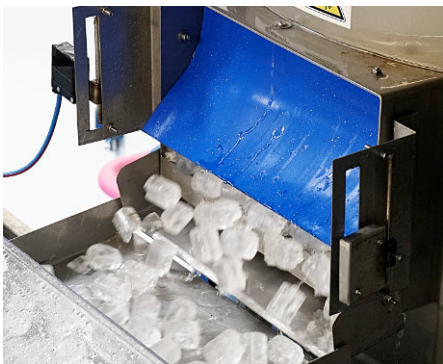

BRC FOOD Certificate
- COD. C636648

A HIGH-QUALITY PRODUCT

The state-of-the-art methods and the use of a toothed circular blade situated in the ice maker, guarantee a clean and uniform cut, resulting in a solid and perfectly cylindrical cube of ice.

Additionally, the reverse osmosis process and the balst chilling phase that the water undergoes impart a high resistance to melting to the GhiaccioFacile® cubes

DISTRIBUTION

We supply 1800 customers with specialized transportation services that ensure punctual delivery.
